1	They seem to have little sense or interest on the impact of their "clinic" on the school or the neighborhood. That they almost walked out of the meeting showed contempt for the community.	4/27/2015 11:31 AM
2	business owner & his staff clearly have no concerns for our children or our neighborhood	4/26/2015 4:33 PM
3	It was almost comical how unprepared, unprofessional, and rude the clinics representatives were at the meeting. They had no answers for questions they had to have thought they were going to be asked. I went there hoping to be informed on the benefits of the clinic and my anxiety reduced, but left more concerned about the clinic. It was truly a pathetic demonstration.	4/26/2015 10:46 AM
4	He clearly is not interested in a favorable relationship with the neighborhood, and he has no plans for ensuring the safety of the neighborhood, including East High students. To decide to locate a methadone clinic across the street from a school indicates a seriously concerning lack of understanding of his business' impact on this community. He does not live in this state and has no stake here. Teenagers are impressionable and will be in close proximity to groups of ailing addicts - a very bad mixture.	4/26/2015 7:43 AM
5	The Dr. was smug	4/25/2015 3:24 PM
6	The owners did themselves no favors with their approach to the meeting, were evasive with answers, and overly defensive.	4/25/2015 1:23 PM
7	Heroin and opiate addiction are problems in Denver, but the placement of the Methadone clinic in our community indicates that our neighborhood has this problem, specifically. Is this true? The best placement for Methadone clinics is not in residential neighborhoods but rather in a medical setting such as the ARTS clinic in Denver.	4/25/2015 11:47 AM
8	They did not inspire confidence in their ability to operate such a risky business or nor did they show any concern for the students or neighborhood.	4/25/2015 10:24 AM

Congress Park Neighbors Inc Methadone Clinic Survey

9	Lack of a detailed operating and safety plan; reliance on the police for safety; a grand total of three parking spaces outside of the building for 200+ clients and employees; disregard for the safety of our students by locating the clinic near a high school despite what the law allows; walking out of the meeting before everyone was done speaking; not being proactive in reaching out to the community given the controversial nature of this business. People walked out of this meeting more upset than when they walked in.	4/25/2015 10:20 AM
10	Seemed to no care about the community,	4/25/2015 9:50 AM

7	That it's opening at all in this area. The location of this operation completely disregards residents who have spent a lot of time and effort over many years re-energizing and revitalizing this section of Colfax. Don't feel singled out: we also dont need any more package liquor stores in our area, either.	4/26/2015 10:46 AM
8	It is the along the path my daughter walks home from school.	4/26/2015 10:38 AM
9	Where is the documentation indicating this neighborhood needs this clinic? Collections of addicts will increase crime throughout Congress Park as clients disperse. The clinic and its proximity to the school will deter homebuyers. Children will be in danger. A bad plan to open shop here.	4/26/2015 7:58 AM

10	move to another location, away from the high school	4/26/2015 7:08 PM
11	neighborhood agreements are meaningless	4/26/2015 4:48 PM
12	The option not listed here is, "shouldn't open; needs to pick a different location." These are great parameters to request for a methadone clinic to follow to be a good neighbor, IF we were to agree first that we want a methadone clinic in the neighborhood. All the communication about this so far seems to presume that there's no recourse for the neighbors, except to let it open and hope it doesn't lead to large immediate problems and worse "businesses" here, and watch our property values take a nosedive along with our feeling of neighborhood pride and safety. I would like the city or neighborhood organization to inform residents how we can oppose the opening of this "clinic," or, barring that, expedite its closing. Do we need to patrol the site, be alert to, and call in (911?) any and all undesirable activities? What else can we do? Has the property owner been engaged in this discussion? Have we engaged the surrounding neighbors and business owners to keep an eye out on this property and report all problems? Is the city doing anything to ameliorate the issues (increased crime, etc.) experienced by neighbors of other Denver methadone clinics?	4/26/2015 10:46 AM

21	Move to the location of the clinic it is replacing. It needs parking and access off Colfax - not so near the children.	4/25/2015 10:50 AM
22	The idea that the nurse will be providing therapy, dosing patients and keeping an eye on the monitors ready to run outside in case of a problem would be laughable if it weren't so dangerous. Identify someone on site who is responsible for the clinic day to day operations. It's not Mr. Tewksbury who lives in CA and operates another clinic in NM or the medical director, already spread among 4 other locations. Is the nurse meant to oversee operations too? Additionally I would like to see a guard during their hours of operation like pot shops are required to do.	4/25/2015 10:34 AM
23	don't move in	4/25/2015 10:33 AM
24	Set up a website with two way communication so that we can report what we're seeing and they can report what steps they are taking. Property clean up needs to be daily. Treatment alternative need to be considered. The best possible outcome is for this business to relocate to a medical campus more than 1000 feet away from a school or child care facility. This feels more like a storefront than it does a medical facility truly equipped to provide appropriate, effective treatment.	4/25/2015 10:32 AM
