

What are the current plans for Congress Park?

"The pool and its structures are important landmarks for our community. Keep the design as close to it is now as possible."

Though most of the pool features need an update, the existing shade structure is in good condition and contains an important piece of public art. We're keeping it intact so it can remain a landmark for future generations.

"We would love it if the kid's pool were larger with more seating."

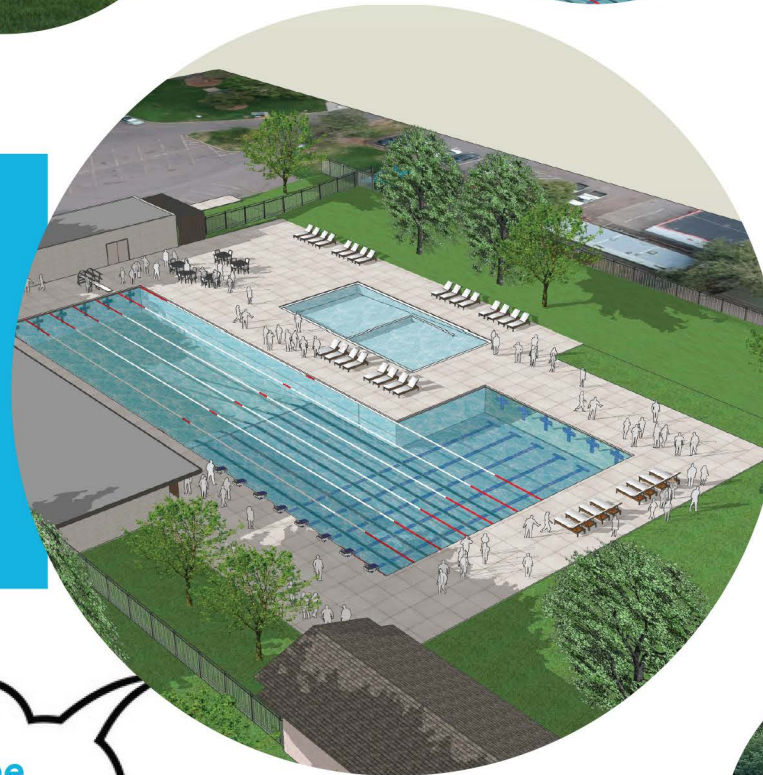

The new design features a youth pool that is 75% larger than the current children's pool, and we have added a new seating area.

The new bath house is classic, functional with timeless materials

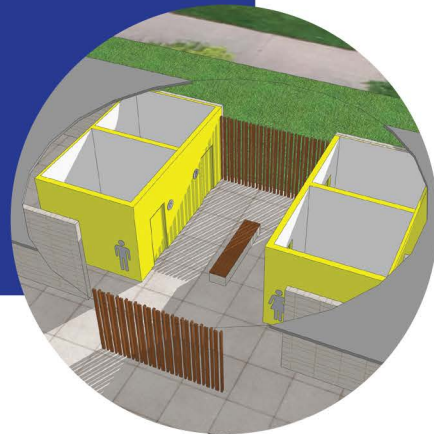

"Please include changing and locker areas for families"

We heard the community loud and clear. The pool will be 50-meters with 6 lanes. It is also designed as an "L" shape, so it could include a 25 yard 6-lane lap pool for programs, lessons and play.

"Include the north hill within the pool area, more lawn seating would be wonderful!"

Done! We added 4 spacious family change rooms with benches and lockers.

"Keep the 50 meter pool! And, if it can be larger, that would be great too."

What did we hear from you?

"Preserve the green space and old trees"

We preserved most of the site's mature trees, and included an additional 12,000 sq. ft. of green space.
